

BEP 3.0

The **BEP 3.0** had initially been developed for those who were looking to replace the original cockpit (also labeled „Brotbox“ in German or „Lunch Box“) of their K75, K100, K1000 or K1 bike with a speedo of a third-party manufacturer.

And everything done completely stress-free without soldering and tangled wires.

No alterations to the wiring harness or modifications of the vehicle are required.

Simply plug in and off you go!

Modell-Liste:

- 1983-1987 K 100 (Series I)
- 1983-1989 K 100 RS
- 1984-1988 K 100 RT
- 1986-1991 K 100 LT
- 1987-1990 K 100 (Series II)
- 1988-1993 K 1
- 1990-1992 K 100 RS 4V
- 1991-1997 K 1100 LT
- 1992-1996 K 1100 RS
- 1985-1990 K 75 C
- 1985-1995 K 75 S
- 1986-1996 K 75 Basic
- 1989-1996 K 75 RT

KOMPATIBLE

The BEP 3,0 can be hooked up to all bikes of the K75, K100, K1 and K1100 series, regardless of the type of fuel level indicator installed, whether LT, RT or RS, and regardless of existing ABS. In any event, all displays will be interpreted and provided correctly.

EMERGENCY MODE

Even if no third-party manufacturer speedometer is connected, the BEP 3.0 accomplishes the full range of essential functions such as closing of the charging circuit generator/battery, turn signal resetting or ensuring a well-functioning starter push-button.

PLUG AND PLAY

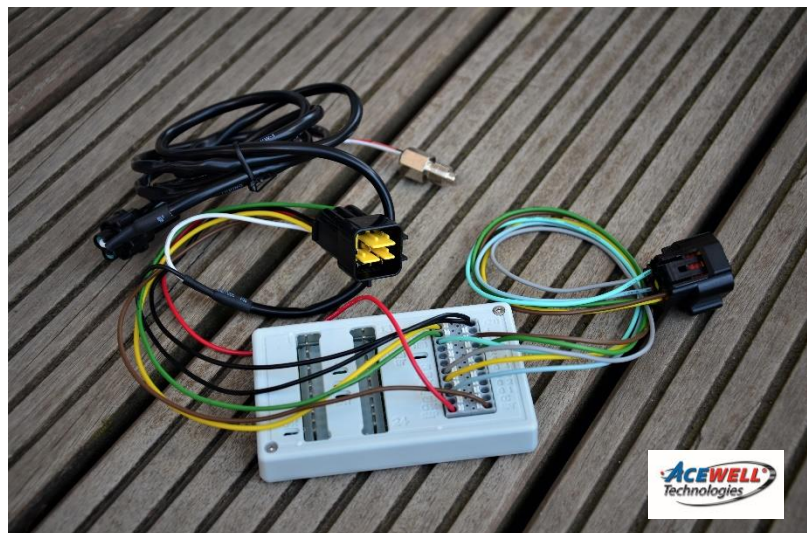

Simply plug in and off you go! When performing the modification, no soldering bit needs to be touched nor is there a need to sever any cables of the wiring harness. Simply plug in, hop on and off you go!

GEAR INDICATOR

The BEP 3.0 is equipped with one outlet for each gear. This allows realization of individual gear indicators with the help of several LEDs.

For ACEWELL instruments that include a gear indicator, it is calculated by rpm and speed. So a perfect solution! A corresponding manual for programming the gear indicator is enclosed.

Neutral
reserve light
number of revolutions
speed
high beam
warninglight
Taillight
Antilock-bracking-system
fuel gauge
alternator
oil
choke
ignition
left blinker
right blinker

BEP 3.0 prepared for you!

And one last important information:

If you decide for an instrument from our range, then we prepare the BEP 3.0 here in our house ready for installation (see photo), so that you have a ready-made plug-and-play solution without additional work.
